Talks

Talks 2020

Date	Speaker	Title	Location	Room
Februar 04 2020 16:45	Martin Stoll (TU Chemnitz)	From PDEs to data science: an adventure with the graph Laplacian	UniBW	Gebäude 33, Room 1431

Talks 2019

Date	Speaker	Title	Location	Room
December 05 2019 14:30	Daniel Walter (TU München)	Optimal feedback stabilization via deep neural network approximation	TUM	02.06.011
November 28 2019 14:30	Lukas Failer (TU München)	Title: Newton-Multigrid Solver for Optimal Control of Fluid-Structure Interaction	TUM	02.06.011
November 26 2019 13:00	Florian Streitbürger (TU Dortmund)	A stabilized DG cut cell method for discretizing the linear advection equation	TUM	02.06.011
November 25 2019 13:00	Clemens Hofreither (RICAM, Linz)	A Unified View of Some Numerical Methods for Fractional Diffusion	TUM	02.06.011
November 21 2019 13:00	Georg Müller (Uni Konstanz)	Multiobjective Optimal Control of a Non-Smooth Semi-Linear Elliptic PDE	TUM	02.06.011
July 15 2019 10:30	Dmitriy Leykekhman (University of Connecticut, USA)	Pointwise error estimates for C^0 interior penalty approximation of biharmonic problems	TUM	02.06.011
February 5 2019 17:00	Christian Meyer (TU Dortmund)	Discrete Schemes for Rate-independent Evolutions with Non-Convex Energies	UniBW	Gebäude 33, Raum 0231
January 21 2019 17:00	Daniel Wachsmuth (Universität Würzburg)	Second-order optimality conditions in optimal control problems	UniBW	Gebäude 33, Raum 1401
